

old NICER figures

new NICER figures

Can also replace HENDRICS zsearch figure and symmetric values

→ how are we mentioning different best period during decay?

Would update values such as exposure time, overall PF, avg count rate

32 phase bins

	Old NICER value	New NICER value
Exposure time epoch 1	6751 s	6464 s
Exposure time epoch 3	4659 s	3015 s
Bg-sub PF epoch 1	0.53+/-0.02	0.54+/-0.02
Bg-sub PF epoch 3		0.49+/-0.03
Avg bg-sub count rate epoch 1 (using 32 bins)	8.2+/-0.4	7.7+/-0.4
Avg count rate epoch 3		4.9+/-0.2
